

STATE OF THE CITY

A REPORT TO THE COMMUNITY
FEBRUARY 2016

CITY OF
AMERICAN
CANYON

A YEAR IN REVIEW

2016 AMERICAN CANYON CITY COUNCIL MEMBERS

Left to right: Kenneth Leary, Vice Mayor Joan Bennett, Mayor Leon Garcia, Belia Ramos, and Mark Joseph

MESSAGE FROM THE MAYOR

With great pleasure I welcome you to the 2016 State of the City report. We like to take this opportunity to reflect on the year just completed and share our plans for the coming year. You will find this report informative and I encourage you to take the time to read it and learn more about your city.

With the economy recovering from its doldrums, there is certainly more optimism in the community. Your city government reflects this optimism, and has spent 2015 gearing up to take on big challenges in 2016. I, and your City Council, believe it is important to be sure our infrastructure is ready to take us into the future and we continue to proceed carefully when considering long term growth and development. In 2015, we dealt with a drought and short term water rates, in anticipation of longer term solutions in 2016. We also look forward to finishing up the Highway 29 corridor plan this year, and need everyone to join that effort. Finally, we are very excited about the improved Kimberly Park and several new special events. These, and more, are described in this report.

We need to hear from you. Take the time to stay engaged with your city government – your involvement makes the entire community be a better place! Look at the back of this report for some ways to learn more throughout the year.

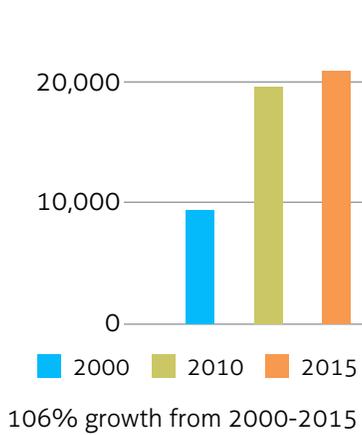

Leon Garcia
Mayor, City of American Canyon

VISION 
American Canyon ...
HOME TO AN ENGAGED, DIVERSE COMMUNITY
DESTINATION FOR OUTDOOR RECREATION and
NATURAL BEAUTY
HUB OF OPPORTUNITY and ECONOMIC
VITALITY

FISCAL SNAPSHOT

FINANCIAL CONDITION

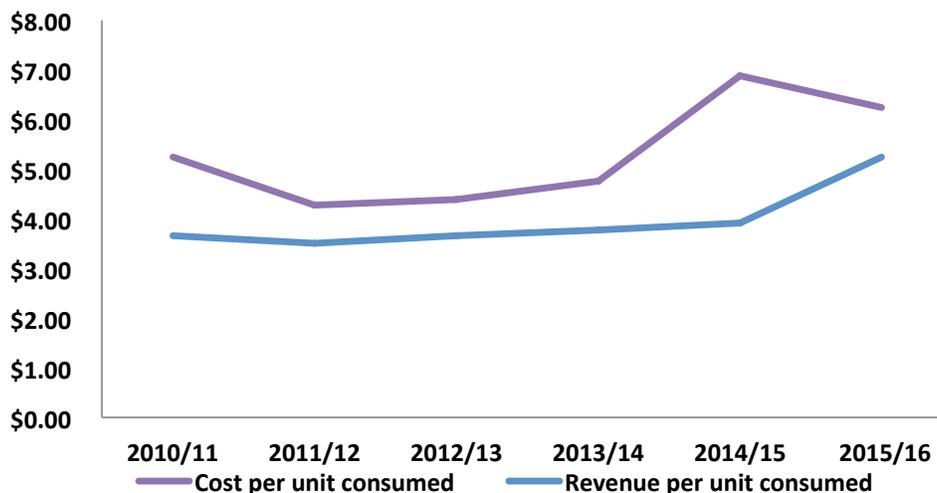

The state and local economy is recovering from the Great Recession and, overall, the City's finances are on a gradual, but sustained path of growth. The City's 2015/16 annual budget reflects this economic recovery and marks the third year of the City's three year plan to ensure restored revenues are allocated to essential and strategic projects and programs. For the 2015/16 fiscal year, property values increased steadily and the November 2015 American Canyon median home sales price shows a 9.5% increase over the median home sales price in 2014. In fiscal year 2014/15 property tax revenue, our single largest source of funding, grew by 8.2% and is projected to grow by an additional 5.4% in fiscal year 2015/16. Looking forward, we believe property values will level off, but new construction coming on line will continue to modestly increase property tax revenues. Unfortunately, however, ongoing sales tax revenues were flat in 2014 and will remain flat in 2015/16 with no significant increases

in any sector of retail sales. Transient occupancy tax (also known as hotel tax), a growing source of revenue for the City and often regarded as a leading economic indicator, continue to increase at strong rates as the economy booms and more people are traveling. Equally notable is the renewed interest in industrial and residential development. As these new projects make their way to construction and occupancy, they generate revenues for the City, helping the City pay for services that American Canyon residents expect. On the expense side of the equation, over the past two years the City has been able to restore staffing reductions lingering from the recession, modestly increase our reserves and decrease long-term debt, and increase funding of some essential programs and projects. Looking ahead into 2016, our focus will be on continuing to decrease long-term obligations and improve programs and projects.

THE WATER FUND

Unfortunately, the prolonged drought has left the water fund in declining fiscal condition. We have encouraged, and even required, all users to conserve water, resulting in reduced revenues for water operations. At the same time as water user fee revenues are decreasing, our cost to purchase water is increasing, along with capital and other costs to improve our system and increase conservation. On September 1, 2015 the City Council approved an emergency water rate surcharge to offset losses in that

fund caused by the drought. This temporary surcharge is reversing the trends in the water fund and will remain in place until the City reviews our expenses and adopts a new water user rate that reflects the actual cost of providing water to our customers. This analysis kicked off in January and we anticipate completion in June. Shown below is a comparison of revenues per unit of water to expenses per unit of water for the past several years.

OUR WATER FUTURE

Highway 70 over Lake Oroville, 2014 and 2011

Last May, in response to the ongoing state-wide drought, the State of California began requiring the City to reduce its potable water demand by at least 16% (when compared to 2013). Since that time, City customers have conserved 27% - significantly exceeding the State requirement. This success was achieved by a combination of fixing leaks, converting park irrigation to recycled water, reducing residential landscaping demands, and adopting good old fashioned water thrifty habits.

While strong rains may have brought an end to the short term water crisis, the rains do not reduce the importance of keeping up our efforts to preserve this valuable resource for the future. Rain or no rain, we are stepping up our efforts to fix leaks, convert more uses to recycled water, and require new businesses to maximize use of recycled water and water-saving technologies. We need you to do the same – keep up your water-wise habits.

In a good water year, the City has more than enough water allocation to meet our current demand, as well as provide for growth. However, in drought years, our allocations are curtailed and the

City Council would like to identify new water sources. To accomplish this goal, we have kicked off a study that will consider options including increased use of recycled water, including for potable purposes and partnering with our neighbor cities to evaluate existing lakes and groundwater options.

In the meantime, we continue to implement our “Zero Water Footprint” policy. Under this policy, the developer of any new project; residential, commercial and industrial; must provide new sources of water to meet their project demand. All the projects currently under way, including Napa Junction phase 3, Canyon Ridge apartments, Napa Logistics Park industrial project and the proposed Watson Ranch project will either identify a new water source or reduce water demand elsewhere in the City to “free up” the water for their project. The projects currently underway, as well as planned for the future, will not use the water currently available to our customers.

There are two other efforts underway that will improve our water future.

In early 2016, we will finalize our long-term master plans for potable

water distribution, wastewater collection and recycled water distribution. These master Plans will identify locations where new infrastructure is needed now and in the future, to support new development.

The discharge permit for the Water Reclamation Facility will be renewed in 2016. This permit is required every five years for all treatment plants that discharge water to the river and bay. This effort will include analyzing ways to change discharge restrictions for industrial businesses while still providing the appropriate level of purification and treatment. The goal is to encourage the development of properties in the Green Island Industrial area for manufacturing, bottling, and similar uses. This permit is critical to our plans for increasing production of recycled water as well.

PUBLIC SAFETY

FIRE DISTRICT

The American Canyon Fire Protection District provides fire services to the City of American Canyon and the unincorporated area of south Napa County. The District provides a high level of fire suppression, prevention, rescue and emergency services to the community and visitors to American Canyon. The District participates on regional response teams including the Napa Inter-Agency Hazardous Incident Team (NIHIT); is recognized by the California Office of Emergency Services (CAL-OES) as a “Heavy Rescue” (Type 1) Urban Search and Rescue (US&R) single resource; and has the capability to respond to and effect structural collapse, confined space, trench, high/low angle and water rescues.

Response time is a critical component in an emergency. The District has established the following goal:

For 90% of all incidents within our jurisdiction, the first due units shall arrive within 5 minutes total time from dispatch.

The District currently has eight (8) State of California licensed Paramedic Firefighters on staff that provide advanced life support (ALS) first response care on medical aid calls for service.

ALL EMERGENCY INCIDENTS

Incident Type	2015	2014
Fire	72	66
Rescue & Emergency Medical	1,047	941
Hazardous Conditions	43	39
Service Calls	96	100
Good Intent Calls	256	269
False Alarms & False Calls	103	111
Special Incidents	1	2
Total Incidents	1,618	1,528
Traning Hours	6,558	6,377

In 2015 the District established a bi-annual Community Emergency Response Training (CERT) program. This nationally recognized emergency training course teaches essential emergency response skills to use during regional emergencies, such as an earthquake or flood. The District also promoted “Hands Only CPR” with the community and held courses throughout the city and the high school.

Firefighter Barnes with the CERT Training Participants

PUBLIC SAFETY

POLICE DEPARTMENT

The City contracts with the Napa County Sheriff's Office to provide law enforcement services to American Canyon. The Police Department is responsible for responding to citizens' calls for service, traffic safety through enforcement, vehicle abatement, crime prevention, gang suppression, criminal investigation and community outreach.

The Police Department has 24 sworn Police Officers, 2 Police Technicians and shares an Administrative Clerk with the Fire Department. Two of these officers are assigned to traffic and two are assigned as K-9 officers. In 2015, we added a second School Resource Officer, so we have officers at both American Canyon High School and American Canyon Middle School full time. Our Community Resource Officer (CRO) is very active in

the community coordinating the Neighborhood Watch program, the DARE program at our three elementary schools, and meeting monthly with management of the apartments and mobile home communities. The CRO also coordinates National Night Out each August. NNO is an event organized to promote community policing and good relationships between the community and the department. NNO is very popular in American Canyon with more than 25 block parties and 500+ people choosing to come out of their houses and socialize with their neighbors along with police, fire and city officials.

PUBLIC WORKS

ACCOMPLISHMENTS

NEW PARKING LOT

Thanks to our funding partners at the Napa County Transportation Planning Agency, we constructed a new parking lot next to the library on Crawford Way. This new lot provides 45 new parking spaces for customers of the library and post office, as well as commuters.

THERESA AVENUE SIDEWALK

We completed the final remaining section of sidewalk along Theresa Avenue near Eucalyptus Drive, providing a safer pedestrian travel path to and from Napa Junction Elementary School.

STREET IMPROVEMENTS

Planning for the future, we widened Newell Drive north of Silver Oak Trail. Thanks to a good deal from our contractor and our partnership with the City of Napa, we resurfaced the road on Donaldson Way near Community Park 2 and Flodden Road southbound from American Canyon Road.

TREATMENT PLANTS UPDATED

In 2015, both the Water Treatment Plant and Water Reclamation Facility (formerly the Wastewater Treatment Plant) installed new filter membrane cassettes. These membranes act like large, high-tech coffee filters and they are the primary tool used to purify our drinking water and recycle our wastewater. This \$4+ million project will ensure our two facilities can efficiently and safely process water for the next seven to ten years.

NEW WATER MAIN LINE

Our drinking water is now delivered through a new transmission pipeline constructed in 2015. This new 6,000 foot pipeline replaces an existing 40-year-old pipeline that had outlived its useful life and was leaking. "Pipe-bursting" construction technology was chosen for the project because it minimized impacts to the environment and traffic on the highway and could be implemented quickly. We estimate this new water main will save 65 million gallons of water each year.

PUBLIC WORKS

LOOKING AHEAD

HIGHWAY IMPROVEMENTS

In 2016, our focus will be on several highway and highway related projects. Engineering and design is under way for Green Island Road widening and reconstruction and the Devlin Road extension, which will extend Devlin Road south to Green Island Road. These projects will reduce congestion during peak periods by providing an alternative route for truck traffic to access the Green Island Industrial Area (and removing them from the highway). Construction of the Green Island project is planned for 2017, with Devlin Road right behind.

Two additional projects, funded by local business developers, are also under way for 2016. Design work is nearly complete for intersection improvements on Highway 29 at South Kelly Road to accommodate traffic from the Napa Logistics Park. Intersection improvements on Highway 29 at Napa Junction Road and Eucalyptus Drive will be constructed in 2016.

TRAIL EXTENSION & SIDEWALK

Construction will begin in late spring to fill in a one-quarter mile gap in the Vine Trail system between Silver Oak Park and Silver Oak Trail. The project is expected to be completed by summer 2016 and will allow you to travel from the high school to Highway 29 on a trail separated from American Canyon Road.

The City will also be designing a new pedestrian sidewalk on Donaldson Way West between Highway 29 and Carolyn Drive with construction anticipated for summer 2017.

RECYCLED WATER

Recycled water, highly treated and cleaned wastewater which can be re-used, is an increasingly important source of water for us. This water can be used to irrigate city parks, flush toilets in some buildings, control dust during construction, and other non-potable uses. In 2016, recycled water will be stored in a new 1.5 million gallon tank recently constructed at the Reclamation Facility. We also converted Tower Park, Shenandoah Park and Silver Oak Park to recycled water for irrigation, saving 15 million gallons per year of potable water for other uses.

SAVING WATER

In 2015, City crews replaced more than 70 residential water service lines that were leaking. This is more than double the amount of leaks repaired in 2014 because of increased detection efforts and technology. These efforts will continue in 2016 as more leaks are identified. The leaks are a result of accelerated corrosion due to a combination of corrosive soils and lack of cathodic protection. The replacement pipes are better designed to protect against corrosion.

In 2015, the City's Cash for Grass program assisted 211 water customers replace 208,393 square feet of turf with native drought tolerant landscaping. Contact City Hall if you would like to participate in this program.

COMMUNITY DEVELOPMENT

ACCOMPLISHMENTS

NAPA LOGISTICS PARK

Construction of Napa Logistics Park phase one began in 2015 south of the Napa Airport. The 646,000 square foot industrial building should be ready for occupancy in the spring. The second phase, an additional 2.3 million square feet of warehouse/logistics development, was approved in December 2015 and should be under construction later in 2016.

NAPA JUNCTION III

The Napa Junction III Residential and Retail Center, at the northeast corner of Highway 29 and Napa Junction Road, has several new buildings under construction.

The Canyon Ridge Apartments is a 140 unit apartment project located on the site. This project is under construction with the first apartments expected to be available in Spring 2017.

CANYON ESTATES

The Canyon Estates subdivision project will be reviewed by the Planning Commission and City Council in early 2016. This project, located east of Vintage Ranch at Granite Springs Way, will provide 35 large residential lots for custom or semi-custom single family homes. Many of the homes will have views of the Napa River and San Pablo Bay.

Other retail and restaurant offerings will also be included at the site. To date, a Taco Bell quick serve restaurant with a drive-thru lane is planned for the corner, and a Dunkin Donuts quick serve restaurant with a drive-thru lane will begin construction in early 2016. Additionally, Tractor Supply Company is planning a new store in the center.

AC GOING GREEN

ENERGY ALTERNATIVE

In 2016, residents and business owners will have the opportunity to choose Marin Clean Energy as their electricity provider. Marin Clean Energy provides electricity through PG&E transmission lines but a higher percentage of the electricity is generated with renewable sources, like solar and hydroelectric. Look for notices about your options later in the year.

REUSABLE BAGS ONLY

January 1 brought the end of free single-use plastic bags at retail locations in American Canyon. The Plastic Bag Reduction Ordinance will make American Canyon a cleaner place by reducing plastic trash and litter in our streets and waterways. Remember to bring your own reusable bag when you shop in American Canyon.

WATER EFFICIENT LANDSCAPING

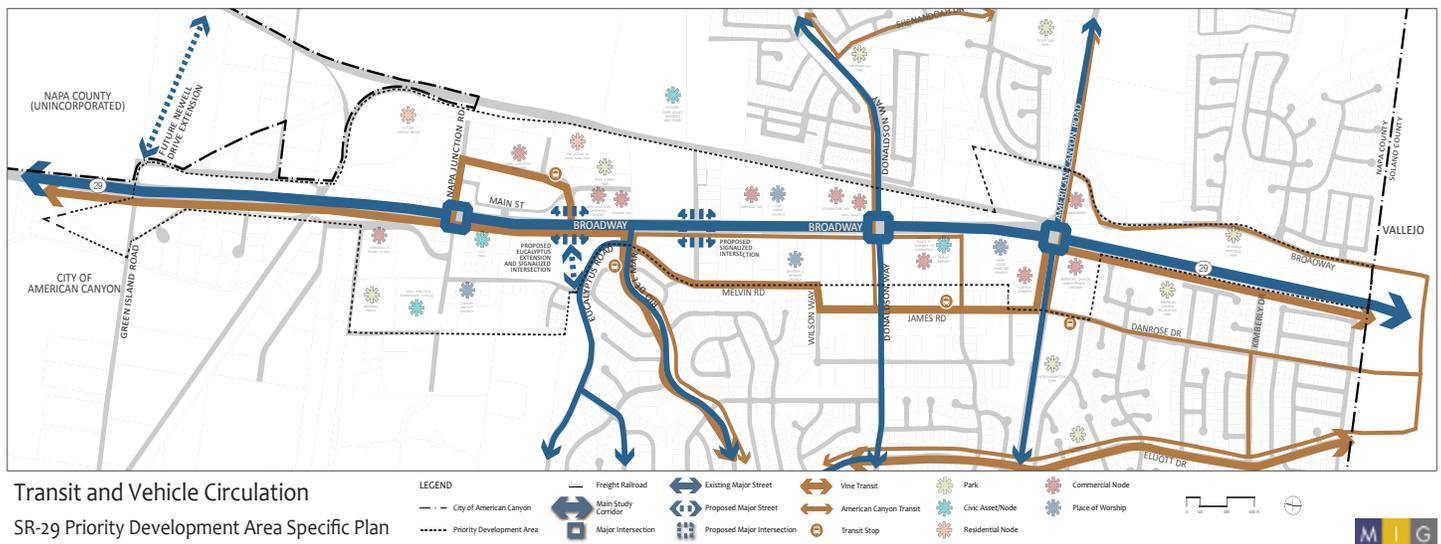

The City Council adopted a new Water Efficient Landscape Ordinance to ensure that landscaping in new development is water efficient in these times of drought and water scarcity. The new ordinance will ensure that landscaping at new homes and commercial developments is beautiful and water-wise by reducing the amount of turf.

COMMUNITY DEVELOPMENT

LOOKING AHEAD

BROADWAY (HIGHWAY 29) CORRIDOR PLANNING

Improving Highway 29 is among the City Council's highest priorities. In 2016, the City will be wrapping up work on a plan for the Broadway District Corridor. This plan provides an opportunity to evolve an auto-oriented highway commercial district into a livable mixed use neighborhood that also serves as the "face of the city" to the many people that travel on the highway each day. The plan will call for widening the highway to three lanes each direction and modifying the signals to smooth out traffic flow. Be on the lookout for several workshops in the first half of 2016 to let us know your ideas and learn more about the future of our highway corridor.

WATSON RANCH

Public review of the Watson Ranch Development application continued in earnest this year with community workshops in January, June, and December. The project, if approved, would include 1,250 dwelling units including single-family homes, townhomes and apartments; a 200-room hotel; a new elementary school; public parks and trails; and rejuvenation of the mine ruins into a new gathering place for residents and visitors. The draft Environmental Impact Report will be released in early 2016 with workshops scheduled on specific topics this spring. The proposed plan is available on the City's website.

PARKS & RECREATION

ACCOMPLISHMENTS

Ceremonial Grass Planting, Bottom of the Basin Ceremony, November, 2015

KIMBERLY PARK

The Kimberly Park Improvement construction project, started in 2015, satisfies two significant needs in the community: it resolves an occasional flooding problem in the area and renovates the very well-used sports fields. Historically, when significant storms coincide with high tides, the streets around Kimberly Park fill with water. The main purpose of this project is to push all this water into the newly created basin at Kimberly Park and keep it off the street. Secondarily, though, Kimberly Park is long overdue for renovation. This project will not only renovate the turf playing fields but also add a real restroom, parking lot, concrete walking path and landscaping. The storm water portion of the project is funded by Napa County Measure A Storm Water Sales Tax and the recreation amenities and restroom are funded from the City General Fund. The project will be completed and open to the public by August of 2016 – just in time for soccer season!

BOCCE

The Charles O. Johnson Memorial Bocce Courts at Veterans Memorial Park were completed in the early spring and league play is underway! Thank you to Mezzetta Foods and Jamieson Ranch Vineyards for providing the funds to complete the bocce courts.

NEW EVENTS AND PROGRAMS

As always, the Spring Egg Hunt, Holiday Tree Lighting and 4th of July were very popular events in 2015. We tried a few new events as well:

- Nearly 300 young “tween-age” soldiers joined the Nerf Wars. Participants brought their own soft-tipped nerf guns and fought against each other in our specially designed arena.
- May the Fourth be with You was a huge hit. May the Fourth be with You is an international celebration of all things Star Wars (held on May 4th, of course!). While we targeted the “tween” age group, we quickly learned that Star Wars fans come in all ages and more than 300 Jedi, Storm Troopers and more joined in the fun.
- We expected 1,500 people at Snow Day and nearly 3,000 showed up! The event included a 1,600 square foot snow play area and 800 square foot sled hill among other activities. Look for a larger and even more fun Snow Day in 2016.
- Our new outdoor and environment classes started in the fall. Some of the opportunities included Acorn Planting and Trivia Trail Hike at Newell, and a Starry Night Party. The Napa-Solano Audubon Society also provides regular programming and special events at the Wetlands.

PARKS & RECREATION

LOOKING AHEAD

PARKS & RECREATION NEEDS ASSESSMENT

The Parks and Recreation Department just completed an extensive Needs Assessment analysis. The study included nearly a year of outreach, information gathering and discussion to determine what parks and recreation programs, facilities and services are needed most in American Canyon. This is the first such study completed in our community and it will help guide us as we address needs in the next five to ten years. The chart lists the programmatic and facility needs identified in the Assessment.

The needs assessment identified a desire for more covered picnic areas. Watch for this improvement in 2016.

PRIMARY NEEDS IDENTIFIED	SECONDARY NEEDS IDENTIFIED
Adult Fitness and Wellness Classes	Outdoor Environmental Programs
Community Special Events	Adult Sports
Swimming: Fitness, Open & Youth	Senior Programs
Youth Summer and Afterschool Programs	Pre-School Programs
Youth Sports Programs	Visual Arts & Crafts – Youth and Adult
Reservations/Rentals of Facilities	Performing Arts Programs
Walking and Biking Trails	Community Center Space
Small Neighborhood Parks	Access to Napa River
Covered Picnic Areas	Adventure Area (Ropes Course)
Aquatics (pools, splash pads)	Sports Complex
Open Space/Conservation	Off-Leash Dog Area
Large Community Parks	
Outdoor Exercise Areas	

CLARKE RANCH

Clarke Ranch, 27 acres near the Wetlands Edge parking lot, is owned by the City and dedicated for outdoor and park related uses. The City will work with the community this year to create a master plan for this land. Because it is adjacent to the wetlands, it is likely that the master plan will include environmentally oriented amenities on the site. The completed plan will show a long range plan for the property including a site plan with proposed amenities, design and construction budget, operational budget, and a phasing and timing plan.

PARKS & RECREATION

COMMUNITY PARTNERS

THE AMERICAN CANYON COMMUNITY AND PARKS FOUNDATION

The American Canyon Community and Parks Foundation (ACCPF) was formed, in partnership with the City, to help meet our funding and programming needs. In 2015, the Foundation hosted several events to increase awareness of the organization and to begin fundraising for needed improvements.

🍁 Kids to Parks Day kicked off at Newell Open Space and will continue each year in May to encourage kids to get outside and play.

🍁 Pumpkin Patch in the Pool was a big hit, giving kids the chance to swim and pick their Halloween pumpkin at the same time!

🍁 The Sunset, Moonrise Hike during the Autumnal Equinox and was very popular, attracting more than 200 people.

🍁 The Foundation hosted a ribbon cutting for the new water fountain at the Wetlands Edge trail head. The new fountain was funded by the community through Foundation fundraising efforts.

To learn more about the American Canyon Community and Parks Foundation, visit their website at www.acparks.org.

NEW AMERICAN CANYON BOYS AND GIRLS CLUB CLUBHOUSE

The American Canyon Boys and Girls Club is preparing to build a new, modern clubhouse to replace the familiar and aging modular buildings at Community Park 2 on Benton Way. Thanks to the generous support of Napa Valley Vintners and many other sponsors, the Boys and Girls Club expects to break ground on this new facility this summer.

The new 15,000 square foot building will include a drop-in center for kids of all ages, teen center, nutrition center and kitchen, community room,

technology center, games room, arts and cultural center, education center, and early childhood center. The City is partnering with the Boys and Girls Club for construction of the community room, providing space for us to expand our recreation classes and programs in the evenings and weekends.

Fundraising for this new facility is not yet complete – visit their website at www.buildingac.org for more information about how you can get involved.

COMMUNITY ENGAGEMENT

FARMER'S MARKET

American Canyon's very own farmers market will be here soon! Beginning Sundays in May you will be able to buy locally grown produce, taste unique food products and enjoy family friendly entertainment. In 2015 the City was awarded a \$75,000 grant from the U.S. Department of Agriculture to launch and support a farmer's market for two years. Pacific Coast Farmers Market Association (PCFMA) has been retained to manage and operate the market. As the operator of more than 60 markets in the Bay Area they bring a wealth of experience and exciting ideas. Events at the market will focus on food, agriculture and health.

SENIOR SHADOW DAY

The City partners with American Canyon High School in many programs to help foster interest in public service. Every fall we host Senior Shadow Day and invite interested seniors to spend the day at City Hall learning more about local government.

CITIZENS ACADEMY

In 2015, 43 residents of American Canyon graduated from our new Citizens Academy. The academy is a nine week course offered twice per year to people interested in learning more about their local government. The goal of the program is to help develop future community leaders and build a better community by creating well-informed and engaged residents. Four of our graduates have been appointed to City boards, commissions or committees and several others have become much more involved at City meetings and community events. Join us in 2016!

CHAMBER OF COMMERCE PARTNERSHIP

In August the American Canyon Chamber of Commerce opened a new Welcome Center at 3860 Broadway. The Chamber of Commerce operates

the center hoping to heighten awareness of all the wonderful things American Canyon has to offer locals and visitors alike. Visitors to the center find information about our distinctive outdoor recreational opportunities, local photography, information about local businesses as well as information about the rest of the Napa Valley.

Early in 2016, the Chamber is implementing a robust Buy Local campaign. The campaign is intended to encourage residents to patronize businesses located right here in American Canyon.

The program will be available to all local businesses free of charge. Support your community and buy American Canyon services and products. For more information, go to www.BuyAmericanCanyon.com.
